

It has come to my attention that you guys are considering allowing LPFM stations to take priority over FM translators. This would be terrible for people in my area. I am an avid listener of 106.7 K-LOVE which is an FM translator station. It is a wholesome family station that lifts my spirits and helps me through my day. It offers encouraging music and spiritual guidance. Thousands and thousands of people in this area love the music and shows played on K-LOVE as much as I do. I ask you to please reconsider allowing the low power FM stations to have precedence because they may hinder/block K-LOVE's signal. Thank you for your consideration of this comment and God bless.
